The **Peter's Pence Collection** is taken up worldwide to support the most disadvantaged – victims of war, oppression, natural disasters and others in need of emergency assistance. Pope Francis has asked us to “care for those who are in need of attention, understanding and help, to bring them the warm closeness of God’s love through tangible actions of sensitivity, of sincere affection and of love.” The Holy Father uses the **Peter's Pence Collection** to strengthen dioceses, religious orders and struggling communities of faith when they need it most.

Prayer for the Sick

Watch, O Lord, with those who wake, or watch, or weep tonight, and give your angels charge over those who sleep. Tend your sick ones, O Lord Christ. Rest your weary ones. Bless your dying ones. Soothe your suffering ones. Pity your afflicted ones. Shield your joyous ones. And for all your love's sake. Amen.

La **Colecta Peter's Pence** se recoge a nivel mundial para apoyar a los menos privilegiados – víctimas de guerra, opresión, desastres naturales y otras personas necesitadas de asistencia en emergencias. El Papa Francisco nos ha pedido que “cuidemos de aquellos que necesitan atención, entendimiento y ayuda, para acercarlos a la cálida del amor de Dios a través de acciones sensibles, de sincero afecto y amor”. El Santo Padre usa la **Colecta Peter's Pence** para fortalecer diócesis, órdenes religiosas y comunidades de fe en pleno conflicto cuando más lo necesitan.

Fr. George's "Did You Know?"

Do you know about Galileo's lamp? Well, as a young man, Galileo would attend Mass at the *Duomo*, the magnificent cathedral in Pisa, Italy. Its bell tower, as you might have guessed, is the famous Leaning Tower of Pisa. The sanctuary lamp, the candle which is burned to let us know that the Blessed Sacrament is present in the tabernacle, hung there from a long cable. On one particular day, Galileo observed something new happening as the sanctuary candle was lit. He noticed that it swung back and forth; each time it completed its swing in the same amount of time. When the swing was long, the lamp swung more rapidly; when it was short, it swung more slowly. However, the total amount of time for each swing was always exactly the same. How did he know this? Well, he timed it by using his own pulse. And this is why it's called Galileo's lamp. Sounds pretty silly but this simple discovery of harmonic motion led to the first accurate clocks. So, if you're late for Mass, it's Galileo's fault, right? I don't think so!
